# WHEEL ALIGNMENT

## RTO Accredited Training Course

Being able to expertly carry out a light vehicle wheel alignment for your customer is vital in ensuring passenger safety and reducing excess and/or uneven tyre wear. But an unskilled wheel alignment can be dangerous for your customers causing the vehicle to drift out of lane, hyper plane on wet roads and/or cause a lack of steering control.

**Protect your customers and your business by ensuring an expert wheel alignment every time!**

**Take advantage of the MTA's nationally recognised and accredited training today!**

Completed over two days or three nights, this course covers the operating principles of steering geometry, wheel alignment procedures, diagnosing faulty systems, component defects and frame alignment checks.

### Units:

- ▶ **AURLTD006** Carry out light vehicle wheel alignment operations

Participants who successfully complete the course will be awarded a Statement of Attainment.

### All candidates that participate in this course need to demonstrate competency in:

- ▶ WHS regulations/requirements, equipment, material and personal safety requirements
- ▶ Operating principles of steering geometry and wheel alignment
- ▶ Wheel alignment procedures
- ▶ Relationships between fault symptoms and component defects
- ▶ Frame alignment checks
- ▶ Wheel alignment system types and their construction
- ▶ Use of measuring tools and testing equipment
- ▶ Use of hand tools and specialised equipment
- ▶ Pre-check procedures
- ▶ Enterprise quality procedures
- ▶ Work organisation and planning processes
